

Wyatt Trigger

Composer

As a passionate and dedicated film composer, I learned at Berklee College of Music and Interlochen Center of the Arts. I started music production as a hobby but grew it into a business, gaining valuable experience in recording, mixing and collaborating with other local artists. With over ten years of piano mastery as well as proficiency in Logic Pro X, I combine technical skills with creative passion. I am deeply committed to enhancing storytelling through music and aim to create emotionally powerful scores that align with sharing inspiring and impactful content that resonates with audiences.
